

## CAREER PROFILE

I have spent the past couple years building single page web applications and games on various VR platforms. I strive to develop quality user interfaces and user experience with design and code.

My favorites include ReactJS, JQuery, Laravel, ExpressJS. When I'm not writing code, I indulge in reading, writing down my thoughts and playing video games. I also do a lot of research and study to keep up with current trends and industry standards in software development.

## FEATURED PROJECTS

### Front End Developer

August 2017

#### Giphy App

- Using giphy.com REST api and AJAX, I created a single page application for users to see trending gifs and search for any gif
- Code is available on github and you should take a look :) (<http://www.deinyefa.com/Giphy-Search/>)

### Front End Developer

August 2017

#### Notebook App

- A simple clone of Apple Notes using ReactJS, Redux, Redux-Persit. Users are able to create notes and group them into folders. Data is stored in the browser's local storage
- Code is available on github and you should take a look :) (<http://www.deinyefa.com/Notebook/>)

### Lead Developer

October 2016

#### Lolipops

- A Candy Crush-type game which tests players to see how many matches they can make in one minute

## EDUCATION

**BSc in Earth Science**  
Carleton University  
2017

## INTERESTS

Reading

DIY Projects

Cooking

- A mobile game available on both Play Store (<https://play.google.com/store/apps/details?id=com.DEFStudios.Lolipops>) and App Store (<https://itunes.apple.com/us/app/lolipops/id1254088209?ls=1&mt=8>)

## **Lead Developer**

May 2017

Scream

- A horror game developed for the HTC Vive
- The detailed article on the development process on my medium page (<https://medium.com/@df.eporwei/the-home-stretch-f92491ecc913>)

## **SKILLS & PROFICIENCY**

**JQuery & Javascript**

**C# & Unity3D**

**ExpressJS & React**

**Git**

**Android Studio**

**Xcode**
